PRASHANT MISHRA

Kanpur, Uttar Pradesh, India

prashantmishra6969@gmail.com | +91-9140887303 | LinkedIn | GitHub

SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with hands-on experience building real-time ML systems and NLP-based applications. Experienced in data preprocessing, model evaluation, and iterative performance improvement using Python and deep learning frameworks. Interested in applied ML engineering roles involving experimentation, large datasets, and model deployment.

EDUCATION

B.Tech — Computer Science & Engineering, Pranveer Singh Institute of Technology, Kanpur, CGPA : 8.13
Class XII (CISCE): 90.5%
Class X (CISCE): 86.6%

TECHNICAL SKILLS

Programming: Python, C++, Java
Machine Learning: Supervised learning, embeddings, similarity matching, model evaluation and tuning
Libraries: NumPy, Pandas, OpenCV, DeepFace, Scikit-learn, SpeechRecognition
NLP: Intent parsing, text processing, command classification
Tools: Git, Streamlit, REST APIs
Concepts: Data preprocessing, feature extraction, threshold optimization, experimentation workflows

PROJECTS

AI Voice Agents Suite – Conversational Voice Systems
(Python, Murf Falcon TTS API, LLM APIs, Speech Processing, Prompt Engineering)
• Developed **10 AI voice agents with distinct personas and capabilities** in a 10-day rapid prototyping challenge.
• Integrated **LLM-generated responses with Murf Falcon high-speed TTS** to produce real-time conversational voice output.

E-ShopMate – Intelligent Recommendation Platform *(React, MongoDB, JavaScript, NLP)*
• Built an **e-commerce recommendation engine** combining user behavior analysis with NLP-based search interpretation.
• Designed a **modular data pipeline** to capture interaction data for personalized recommendations and future ML model training.

JARVIS AI Assistant **– Cross-Device Automation System** *(Python, NLP, Automation APIs)*
• Developed a **modular AI assistant** capable of executing system commands and answering queries via natural language input.
• Implemented **intent detection and command routing** to support offline automation and online information retrieval.

CERTIFICATIONS & PRACTICE

Google Cloud Skills Boost — APIs & Cloud Computing Labs
AI Agents Intensive Course — Applied AI system building
LeetCode — 240+ Data Structures & Algorithms problems solved

ADDITIONAL

Strong interest in applied machine learning experimentation, model optimization, and productionizing AI systems. Comfortable learning new frameworks quickly and working with unstructured real-world data.
